October 13, 2008

Federal Reserve and other central banks announce further measures to provide broad access to liquidity and funding to financial institutions

For release at 2:00 a.m. EDT

Share 

In order to provide broad access to liquidity and funding to financial institutions, the Bank of England (BoE), the European Central Bank (ECB), the Federal Reserve, the Bank of Japan, and the Swiss National Bank (SNB) are jointly announcing further measures to improve liquidity in short-term U.S. dollar funding markets.

The BoE, ECB, and SNB will conduct tenders of U.S. dollar funding at 7-day, 28-day, and 84-day maturities at fixed interest rates for full allotment. Funds will be provided at a fixed interest rate, set in advance of each operation. Counterparties in these operations will be able to borrow any amount they wish against the appropriate collateral in each jurisdiction. Accordingly, sizes of the reciprocal currency arrangements (swap lines) between the Federal Reserve and the BoE, the ECB, and the SNB will be increased to accommodate whatever quantity of U.S. dollar funding is demanded. The Bank of Japan will be considering the introduction of similar measures.

Central banks will continue to work together and are prepared to take whatever measures are necessary to provide sufficient liquidity in short-term funding markets.

Federal Reserve Actions

To assist in the expansion of these operations, the Federal Open Market Committee has authorized increases in the sizes of its temporary swap facilities with the BoE, the ECB, and the SNB, so that these central banks can provide U.S. dollar funding in quantities sufficient to meet demand.

These arrangements have been authorized through April 30, 2009.
