Notes

See also: Chartered Banks: Notes for Banking and Financial Statistics

Source: Bank of Canada, Office of the Superintendent of Financial Institutions (OSFI)

Data cover chartered bank non-mortgage loans. The institutional sectors used for these data conform to the Statistics Canada definitions in the financial flow sector accounts. Data in this table are reported gross of allowance for impairment and will therefore differ from non-mortgage loans as presented in *Chartered bank assets: Month-end (formerly C3)*. The detailed loan categories cover only non-mortgage loans to Canadian residents – loans to non-residents are shown separately in the table. Foreign currency loans have been converted into their Canadian dollar equivalents using the closing exchange rate prevailing on the last business day of the quarter.

The Canadian dollar portion of *loans to Canadian individuals for non-business purposes* generally conforms to the total personal loan series previously reported, except that loans are reported gross of allowance for impairment and also do not include loans to non-residents. *Tax-sheltered plans* include loans for registered savings plans such as RRSPs and RHOSPs. *Marketable stocks and bonds* are loans to individuals other than investment dealers and brokers which, when made, were fully secured by marketable stocks and bonds.

Loans to purchase consumer goods and other personal services include loans secured by marketable stocks and bonds that have been identified as being used to purchase consumer goods or services. *Private passenger vehicles* include all loans so identified whether or not they are secured by the purchased vehicle. *Mobile homes* include non-mortgage loans for all mobile homes as defined in the National Housing Act.

Credit cards include all outstanding balances under a credit card plan.

Deposit-taking financial institutions include Canadian chartered banks, Quebec savings banks, credit unions and caisses populaires, trust companies and mortgage loan companies. *Other* financial institutions include insurance companies, pension funds, consumer and business finance companies, investment companies, and public financial institutions.

Non-financial corporations and unincorporated businesses include all corporations, unincorporated businesses and unincorporated branches of foreign corporations operating in Canada (except financial institutions and government enterprises), and are classified using the *1980 Standard Industrial Classification* published by Statistics Canada.

Agriculture includes agricultural industries as well as service industries incidental to agriculture, e.g., the veterinary and harvesting industries etc. *Energy* includes establishments primarily engaged in exploration and/or production of conventional petroleum and natural gas. *Builders* and developers include those engaged in either residential or non-residential building activities. Land developers are included under other construction. *Multi-product conglomerates* include those non-financial private corporations in which no one business constitutes more than 50 per cent of the corporation's total activity. *Unincorporated businesses* include all businesses that are not incorporated under the law of Canada or a province and that are not unincorporated branches of foreign corporations.

Government enterprises include all Canadian and foreign public corporations in which a government holds at least 50 per cent of the voting stock and any subsidiaries of these companies. It also includes all governmental bodies that carry on a business and have their own borrowing authority.

Loans to institutions include loans to private non-profit institutions and to religious, health and educational institutions.

Loans to governments include loans to all governmental entities that do not carry on a business or do not have their own borrowing authority.

Loans to non-residents are loans to individuals, corporations or other organizations not ordinarily resident in Canada, but do not include lease financing receivables of non- residents or loans to and deposits with non-resident associated corporations, which are reported under *leasing receivables*.

Loans made under Government of Canada guaranteed loans schemes do not include funds advanced under the Small Business Development Bond or Small Business Bond programs, as these instruments are classified as securities on the books of the chartered banks.

Beginning December 1994, *loans by securities subsidiaries* exclude reverse repurchase agreements.

Beginning December 1994, *loans to non-residents* exclude reverse repurchase agreements.
