*Final loan amount (after the roll-over of the bank recapitalisation loans)

Maximum weighted average maturity: 42.5 years

As a result of short-term and medium-term debt relief measures for Greece (approved by the EFSF Board of Directors in January 2017 and November 2018), the EFSF loan tranches were re-profiled twice. This involved an extension of the loan maturities; details are shown in the table below.
