Delivering on Our Mission

Provided approximately \$190 billion in liquidity to the mortgage market during the first six months of 2017. Expanded access to affordable housing: funding for first-time homebuyers, as a percentage of new purchases, continued at a 10-year high and nearly 85 percent of rentals funded were affordable to working families.

- Providing Liquidity while Transforming U.S. Housing Finance
 Guarantee portfolio increased to \$1,784 billion at June 30, 2017; up 4 percent from a year ago.
- Core loan portfolio (after 2008) was 75 percent of the total guarantee portfolio; up 6 percentage points from a year ago.
- Purchase volume of \$73 billion declined 20 percent from a year ago, as refinancing volumes declined. Serious delinquency rate of 0.85 percent, down 23 basis points from a year ago; at its lowest point since early 2008. Transferred a significant portion of the credit risk on nearly \$105 billion of loans; have now transferred a portion of the credit risk on nearly 33 percent of the total outstanding single-family credit guarantee portfolio; up from 26 percent a year ago.

Leading the Multifamily Finance Industry

- Guarantee portfolio increased to \$174 billion at June 30, 2017; up 23 percent from a year ago. Purchase volume of \$14.1 billion increased 50 percent from a year ago due to continued strong market demand. Outstanding loan commitments of \$19 billion were also up significantly over the prior year.
- Delinquency rate continues near zero at 0.01 percent and has remained below 0.05 percent since early 2014. Transferred a large majority of the credit risk on \$12.3 billion of loans in the second quarter of 2017 and over \$200 billion of loans since the program's inception in 2009.

(1) Guarantee fee income on a GAAP basis is primarily from the company's multifamily business and is included in Other income (loss) on Freddie Mac's condensed consolidated statements of comprehensive income.

Financial Results Discussion

Freddie Mac's second quarter 2017 net income of \$1.7 billion and comprehensive income of \$2.0 billion decreased \$0.5 billion and \$0.2 billion, respectively, from the first quarter of 2017. The company's quarter-over-quarter earnings were relatively stable as market-related impacts remained low.

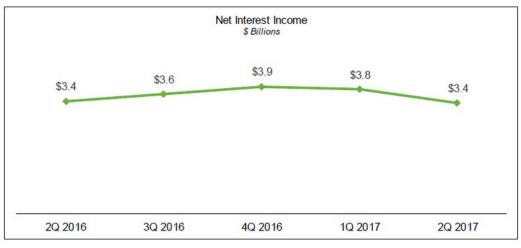

- Net Interest Rate Effect: \$0.1 billion (after-tax) estimated fair value loss for the second quarter of 2017 driven by slight decreases in interest rates, compared to near zero (after-tax) estimated fair value gain for the first quarter of 2017 driven by slight increases in interest rates. (See Net Interest Rate Effect table for additional details.)
- Spread Change Effect: \$0.1 billion (after-tax) estimated gain for the second quarter of 2017, comparable to the \$0.1 billion (after-tax) estimated gain for the first quarter of 2017, as market spreads were relatively unchanged from the first quarter of 2017.

5	Estimated net interest rate effect on comprehensive income (loss)	\$	(0.1)	\$	0.0	\$	(0.1)	\$	(0.4)	\$	0.3

(1) Includes the interest-rate effect on the company's trading securities, available-for-sale securities, mortgage loans held-for-sale, and other assets and debt for which the company elected the fair value option, which is reflected in Other non-interest income (loss) and Total other comprehensive income (loss) on Freddie Mac's condensed consolidated statements of comprehensive income.

Selected Financial Measures

Net interest income was \$3.4 billion for the second quarter of 2017, a decrease of \$0.4 billion, or 11 percent, from the first quarter of 2017 and unchanged from the
prior year.

 The decrease in net interest income from the prior quarter primarily reflected lower amortization income and a 2 percent decline in the balance of the mortgage-related investments portfolio.

August Page 4

(1) Guarantee fee income on a GAAP basis is primarily from the company's multifamily business and is included in Other income (loss) on Freddie Mac's condensed consolidated statements of comprehensive income.

• Guarantee fee income, primarily from the company's multifamily business, was \$158 million for the second quarter of 2017, increasing \$9 million, or 6 percent, from the first quarter of 2017 and \$34 million from the prior year.

The increases in guarantee fee income primarily reflected higher average multifamily guarantee portfolio balances.

- Benefit for credit losses was \$422 million, an increase of \$306 million from the first quarter of 2017 and a decrease of \$353 million from the prior year.
 - The increase in benefit for credit losses from the prior quarter primarily reflected a significant increase in the number of reperforming loans reclassified from held-for-investment to held-for-sale as the company continued to focus on reducing the balance of its less liquid assets.
 - The decrease in benefit for credit losses from the prior year primarily resulted from smaller improvements in probability of default and estimated loss severity in the second quarter of 2017,

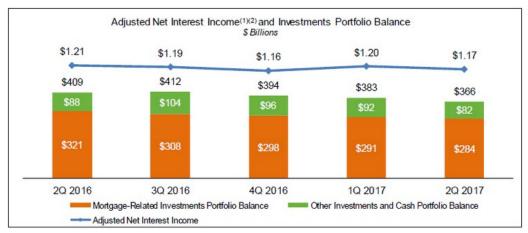

compared to larger improvements in probability of default and estimated loss severity in the second quarter of 2016.

Non-GAAP Financial Measure Highlights

In addition to analyzing the company's results on a GAAP basis, management reviews certain financial measures on an "adjusted", or non-GAAP, basis. The adjusted, or non-GAAP, financial measures are calculated by reclassifying certain credit guarantee-related activities and investment-related activities between various line items on the company's GAAP condensed consolidated statements of comprehensive income. Management believes the non-GAAP financial measures are useful because they more clearly explain the company's sources of revenue. The company does not present adjusted measures for net income or comprehensive income.

- The company's GAAP net interest income includes the spread earned on its investments activities plus the guarantee fees earned by its single-family business.
 GAAP guarantee fees are primarily those generated by its multifamily business.
 - Adjusted net interest income is the net spread earned on the company's investments activities, including the cost of funds associated with using derivatives.
 - Adjusted guarantee fee income consists of the revenues from guarantee fees from both the single-family and multifamily businesses, net of the 10 basis
 point guarantee fee remitted to Treasury as part of the Temporary Payroll Tax Cut Continuation Act of 2011.

The two graphs that follow show the company's non-GAAP financial measures - adjusted net interest income and adjusted guarantee fee income.

(1) Non-GAAP financial measure. For reconciliations to the comparable amounts under GAAP, see pages 15-16 of this press release.

(2) During the first quarter of 2017, the company discontinued adjustments which reflected the reclassification of amortization of upfront cash paid and received upon acquisitions and issuances of swaptions and options from GAAP derivative gains (losses) to adjusted net interest income. Prior period results have been revised to conform to the current period presentation.

Note: Amounts may not add due to rounding.

- Adjusted net interest income was \$1.17 billion, a decrease of \$33 million from the first quarter of 2017 and \$41 million from the prior year.
 - Adjusted net interest income has remained relatively stable over the last year, despite the expectation of a decline over the long-term, primarily due to
 higher net interest yield on both other investments and mortgage-related investments.

Page 6

- The expectation of a decline in adjusted net interest income over the long-term is primarily a result of the company's ongoing reduction of its mortgagerelated investments portfolio in accordance with the requirements of the Purchase Agreement and FHFA.
- The mortgage-related investments portfolio was \$283.7 billion as of June 30, 2017, a decline of \$7.5 billion from March 31, 2017.
 - The company remains focused on reducing the balance of less liquid assets in this portfolio. The balance of less liquid assets was \$109.2 billion as of June 30, 2017, a decline of \$8 billion, or 7 percent, from March 31, 2017.
 - Less liquid assets include reperforming loans, single-family seriously delinquent loans, and mortgage-related securities not guaranteed by a GSE or the U.S. government.

(1) Non-GAAP financial measure. For reconciliations to the comparable amounts under GAAP, see pages 15-16 of this press release.

(2) Calculated as annualized quarterly adjusted guarantee fee income divided by the total guarantee portfolio balance.

Note: Amounts may not add due to rounding.

- Adjusted guarantee fee income was \$1.67 billion, an increase of \$99 million from the first quarter of 2017 and \$43 million from the prior year.
 - The increase in adjusted guarantee fee income from the prior quarter primarily reflected higher amortization of single-family upfront fees driven by an increase in loan prepayments during the second quarter of 2017.
 - Adjusted guarantee fee income increased slightly when compared to the prior year driven by continued growth in the total guarantee portfolio.
 - Adjusted guarantee fee income from contractual guarantee fees is expected to increase over the long-term as guarantee fees on new single-family business are generally higher than the fees received on older vintages that continue to run off.
 - o Changes in the rates of amortization of single-family upfront fees into income are driven by fluctuating levels of loan prepayments due to changes in interest rates.
 - The total guarantee portfolio balance grew to \$1,958 billion at June 30, 2017, an increase of \$15 billion, or 1 percent, from March 31, 2017 and \$103 billion, or 6 percent, from the prior year.

Segment Financial Results and Business Highlights

Freddie Mac's operations consist of three reportable segments, which are based on the types of business activities they perform – Single-family Guarantee, Multifamily and Capital Markets (formerly called "Investments"). The company presents Segment Earnings by reclassifying certain credit guarantee-related activities and investment-related activities between various line items on its GAAP condensed consolidated statements of comprehensive income and allocating certain revenues and expenses, including funding costs and administrative expenses, to its three reportable segments. For more information about Segment Earnings, see Note 11 to the financial statements included in the company's Quarterly Report on Form 10-Q for the three months ended June 30, 2017 and page 16 of this press release.

8	Total comprehensive income	\$ 778	\$ 708	\$ 70	\$ 583	\$ 195

(1) The financial performance of the company's Single-family Guarantee segment is measured based on its contribution to GAAP net income (loss).

- Single-family Guarantee segment earnings were \$778 million for the second quarter of 2017, an increase of \$68 million, or approximately 10 percent, from the first quarter of 2017 and \$194 million, or 33 percent, from the prior year.
 - The increase in segment earnings from the prior quarter primarily reflected higher amortization of upfront fees driven by an increase in loan prepayments during the second quarter of 2017.
 - The increase in segment earnings from the prior year was primarily driven by gains due to price improvements on reperforming loans reclassified from held-for-investment to held-for-sale in the second quarter of 2017 compared to losses primarily on seriously delinquent loans reclassified during the second quarter of 2016.

Business Highlights

- Core loan portfolio (after 2008), which excludes HARP and other relief refinance loans, continued to grow and was 75 percent of the single-family credit guarantee portfolio at June 30, 2017.
- Average guarantee fees charged on new acquisitions were 43.6 basis points (net of the legislated 10 basis point guarantee fee remitted to Treasury as part of the Temporary Payroll Tax Cut Continuation Act of 2011) for the second quarter of 2017, down slightly from 44.2 basis points in the first quarter of 2017.
 - Average guarantee fees on the single-family credit guarantee portfolio were 33.9 basis points, an increase of 1.8 basis points from the first quarter of 2017, primarily due to higher amortization of upfront fees driven by loan prepayments during the second quarter of 2017.

) Total comprehensive income	\$ 462	\$ 445	\$ 17	\$ 271	\$ 191

(1) The financial performance of the company's Multifamily segment is measured based on its contribution to GAAP comprehensive income (loss).

- Multifamily segment comprehensive income was \$462 million for the second quarter of 2017, an increase of \$17 million, or 4 percent, from the first quarter of 2017 and \$191 million, or 70 percent, from the prior year.
 - The increase in comprehensive income from the prior quarter was primarily driven by higher net interest income on certain multifamily securities and higher guarantee fee income, partially offset by lower mark-to-market gains in the second quarter of 2017.
 - The increase in comprehensive income from the prior year was primarily driven by fair value gains and increased guarantee fee income.
- Derivative gains (losses) for the Multifamily segment are largely offset by interest rate-related fair value changes of the loans and investment securities being
 economically hedged. As a result, there is minimal net impact on total comprehensive income for the Multifamily segment from interest rate-related derivatives.

Business Highlights

- New purchase volume of \$14.1 billion for the second quarter of 2017 increased 11 percent from the first quarter of 2017, while outstanding loan commitments increased \$5 billion to \$19 billion, reflecting continued strong market demand.
 - The capped multifamily new business activity for the second quarter of 2017 was \$6.7 billion.
 - o The 2017 FHFA Scorecard goal is to maintain the dollar volume of annual multifamily new business activity at or below a production cap of \$36.5 billion.
- Executed 12 K Certificate and 5 SB (Small Balance) Certificate transactions that transferred a large majority of expected and stress credit losses associated with \$12.3 billion in UPB of loans during the second quarter of 2017.
- Provided financing for approximately 174,000 rental units in the second quarter of 2017.
 - 84 percent of the eligible units financed in the first half of 2017 were affordable to families earning at or below area median incomes.

(1) The financial performance of the company's Capital Markets segment is measured based on its contribution to GAAP comprehensive income (loss).

- Capital Markets segment comprehensive income was \$746 million for the second quarter of 2017, a decrease of \$335 million, or 31 percent, from the first quarter of 2017 and an increase of \$467 million from the prior year.
 - The decrease in comprehensive income from the prior quarter was primarily driven by lower amortization income and higher fair value losses as a result of decreases in longer-term interest rates during the second quarter of 2017.
 - The increase in comprehensive income from the prior year was primarily driven by decreased losses due to the use of hedge accounting during the second quarter of 2017.
- On February 2, 2017, the company began using fair value hedge accounting for certain single-family mortgage loans, which reduced its GAAP earnings sensitivity
 to large interest rate movements by nearly 55 percent in the second quarter of 2017.

Business Highlights

- Continued to responsibly reduce the balance of the company's mortgage-related investments portfolio, with a focus on reducing the balance of less liquid assets. The Capital Markets segment less liquid assets were \$73.3 billion at June 30, 2017, down \$2.7 billion, or 4 percent, from March 31, 2017, due primarily to sales of \$1.1 billion of reperforming loans and \$0.5 billion of non-agency mortgage-related securities and ongoing portfolio liquidations.
- The Capital Markets segment securitization pipeline assets, which represent performing single-family loans purchased for cash and held until securitized, were \$12.1 billion at June 30, 2017, up \$4.4 billion from March 31, 2017.
- Continued to maintain a presence in the agency mortgage-related securities market to strategically support the guarantee business.
 - Liquid assets held by the Capital Markets segment were \$137 billion at June 30, 2017, or 62 percent of the portfolio.

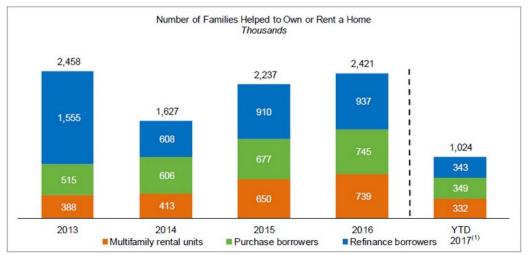

Housing Market Support

Freddie Mac supports the U.S. housing market by executing its charter mission to ensure credit availability for new and refinanced mortgages as well as rental housing while also helping struggling homeowners avoid foreclosure.

Preventing Foreclosures – Freddie Mac continued to help struggling borrowers retain their homes or otherwise avoid foreclosure, completing approximately 35,000 single-family loan workouts in the six months ended June 30, 2017.

Mortgage Funding - Freddie Mac provided approximately \$190 billion in liquidity to the market in the six months ended June 30, 2017, funding:

- Nearly 692,000 single-family homes, approximately 343,000 of which were refinance loans; and
- Approximately 332,000 multifamily rental units.

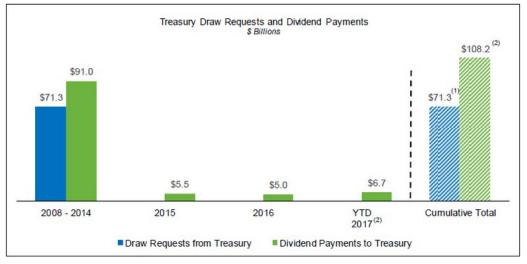

(1) As of June 30, 2017.

Note: Amounts may not add due to rounding.

About Freddie Mac's Conservatorship

Since September 2008, Freddie Mac has been operating under conservatorship, with FHFA as Conservator. The support provided by Treasury pursuant to the Purchase Agreement enables the company to maintain access to the debt markets and to have adequate liquidity to conduct its normal business operations.

Treasury Draw Requests and Dividend Payments

(1) Excludes the initial \$1 billion liquidation preference of senior preferred stock issued to Treasury in September 2008 as consideration for Treasury's funding commitment. The company received no cash proceeds as a result of issuing this initial \$1 billion liquidation preference of senior preferred stock.

(2) As of June 30, 2017.

Note: Amounts may not add due to rounding.

- Based on our Net Worth Amount of \$2.6 billion as of June 30, 2017 and the Capital Reserve Amount of \$600 million in 2017, our dividend requirement to Treasury
 in September 2017 will be \$2.0 billion. If the Conservator declares a senior preferred stock dividend equal to our dividend requirement and directs us to pay it before
 September 30, 2017, we would expect to pay a dividend of \$2.0 billion by September 30, 2017.
 - The applicable capital reserve amount is \$600 million for 2017 and will be zero beginning on January 1, 2018.
 - The declining capital reserve required under the terms of the Purchase Agreement (ultimately reaching zero in 2018) increases the risk of Freddie Mac having a negative net worth and thus being required to draw from Treasury.
- Aggregate cash dividends paid to Treasury totaled \$108.2 billion, \$36.9 billion more than cumulative cash draws of \$71.3 billion received from Treasury through June 30, 2017.
- The amount of funding available to Freddie Mac under the Purchase Agreement remains unchanged at \$140.5 billion and will be reduced by any future draws.
- Treasury still maintains a liquidation preference of \$72.3 billion on the company's senior preferred stock as of June 30, 2017.
 - The payment of dividends does not reduce the outstanding liquidation preference under the Purchase Agreement, although we are permitted to pay down
 the liquidation preference of the outstanding shares of senior preferred stock to the extent of accrued and unpaid dividends previously added to the
 liquidation preference and not previously paid down.
 - Freddie Mac is not permitted to redeem the senior preferred stock prior to the termination of Treasury's funding commitment under the Purchase Agreement.

Note: Columns may not add due to rounding.

For notes on reclassifications, see page 16 of this press release.

During the first quarter of 2017, the company changed how it calculates certain components of its Segment Earnings for its Capital Markets segment. The purpose of this change is to simplify Segment Earnings results relative to GAAP results in order to better reflect how management evaluates the Capital Markets segment. Prior period results have been revised to conform to the current period presentation. The change to the calculation of net interest income for the Capital Markets segment is also reflected in the company's calculation of adjusted net interest income.

The change includes:

- The discontinuation of adjustments which reflected the reclassification of amortization of upfront cash paid and received upon acquisitions and issuances of swaptions and options from derivative gains (losses) to net interest income for the Capital Markets segment.
 - o The discontinuation of the adjustments resulted in an increase to adjusted net interest income of \$281 million, \$319 million, \$402 million, and \$347 million for the three months ended March 31, 2016, June 30, 2016, September 30, 2016, and December 31, 2016, respectively, to align with the current presentation. This change did not affect the calculation of adjusted guarantee fee income.

Notes on Significant Reclassifications

⁽¹⁾Net guarantee fees are reclassified from GAAP net interest income to adjusted guarantee fee income.

(2) Implied guarantee fee income related to unsecuritized loans held in the mortgage investments portfolio is reclassified from GAAP net interest income to adjusted guarantee fee income.

(3) The accrual of periodic cash settlements of all derivatives is reclassified from GAAP derivative gains (losses) into adjusted net interest income to fully reflect the periodic cost associated with the protection provided by these contracts.

⁽⁴⁾ Other reclassifications primarily relate to items reclassified out of GAAP net interest income, including the amortization of premiums and discounts associated with the company's PCs and the loans underlying those PCs, amortization of non-cash premiums on single-family loans in trusts and on consolidated PCs, amortization of discounts on loans purchased with deteriorated credit quality that are on accrual status, the accretion of other-than-temporary impairments on available-for-sale securities, STACR debt note expense and net float income or expense.

⁽⁵⁾ The expense related to the Temporary Payroll Tax Cut Continuation Act of 2011 is reclassified from GAAP other non-interest expense to adjusted guarantee fee income. As a result of the reclassification, the revenue and expense related to the legislated 10 basis point increase are netted within adjusted guarantee fee income.

Freddie Mac

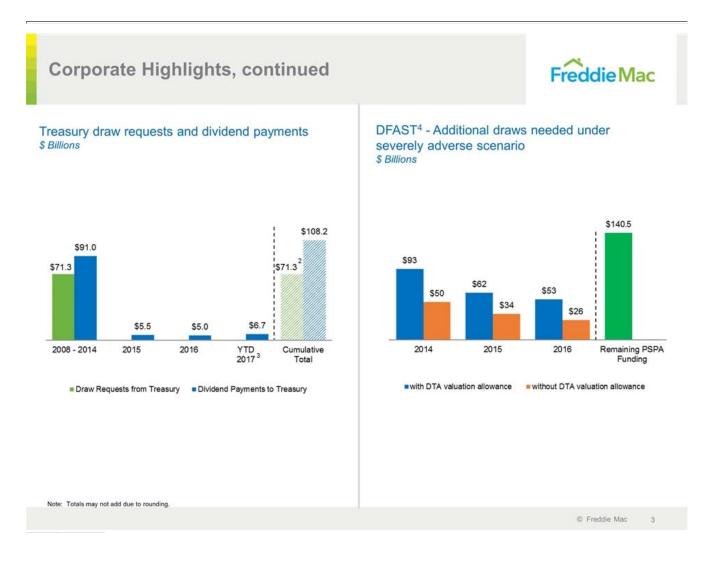

Key highlights

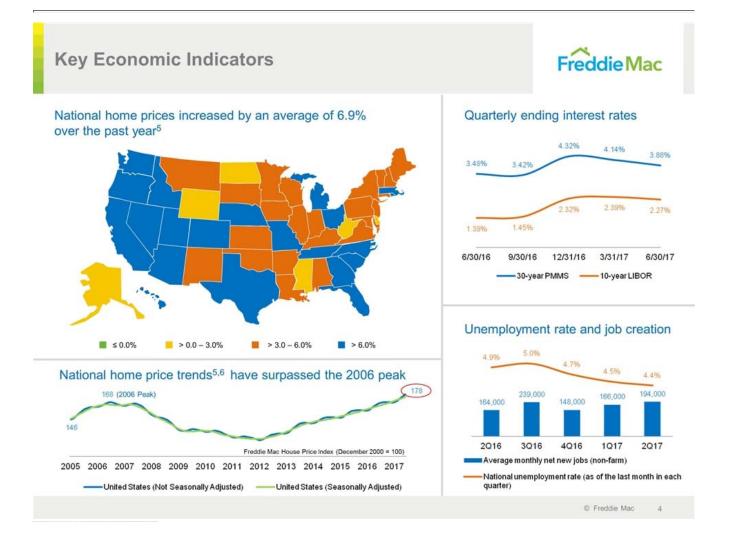

- Comprehensive Income (CI) of \$2.0 billion, Net Income of \$1.7 billion.
- CI stable quarter-over-quarter due to reduction in market-related earnings volatility.
 - Market spreads were relatively unchanged.
 Implementation of hedge accounting offset most net losses arising from changes in interest rates.
- Higher adjusted guarantee fee income partly due to continued growth in total guarantee portfolio balances.
- Credit quality: improving in Single-family, very strong in Multifamily.

Footnotes

- 1 For additional information regarding Freddie Mac's non-GAAP financial measures and reconciliations to the comparable amounts under GAAP, see the company's earnings release for the guarter ended June 30, 2017.
- 2 Excludes the initial \$1 billion liquidation preference of senior preferred stock issued to Treasury in September 2008 as consideration for Treasury's funding commitment. The company received no cash proceeds as a result of issuing this initial \$1 billion liquidation preference of senior preferred stock.
- 3 Data for the six months ended June 30, 2017
- 4 For additional information, see Regulation and Supervision Federal Housing Finance Agency Capital Standards in the company's Annual Report on Form 10-K for the year ended December 31, 2016. (DFAST: Dodd-Frank Act Stress Test)
- 5 The Freddie Mac House Price Index for the U.S. is a value-weighted average of the state indices where the value weights are based on Freddie Mac's single-family credit guarantee portfolio. Other indices of home prices may have different results, as they are determined using different pools of mortgage loans and calculated under different conventions. The Freddie Mac House 2006 to June 2017. Price Index for the U.S. is a non-seasonally adjusted (NSA) monthly series. Cumulative increase, based on the NSA series, calculated as the precent change from June 2016.
- 6 Seasonal factors typically result in stronger house price appreciation during the second and third quarters. Historical growth rates change as new data becomes available. Values for the most recent periods typically see the largest changes.
- 7 Based on unpaid principal balances (UPB) of loans and securities. Excludes mortgage-related securities traded, but not yet settled. The mortgage-related investments portfolio is determined without giving effect to the January 1, 2010 change in accounting standards related to the transfer of financial assets and consolidation of variable interest entities (VIEs).
- 8 Primarily Freddie Mac's K Certificate and SB (Small Balance) Certificate transactions.
- 9 See Freddie Mac's Form 10-Q for the quarter ended June 30, 2017 for information about the company's Other investments and cash portfolio.
- 10 Represents the unpaid principal balance of the company's mortgage-related investments portfolio.
- 11 The company's Purchase Agreement with Treasury limits the amount of mortgage assets the company can own and indebtedness it can incur. Under the Purchase Agreement, mortgage assets and indebtedness are calculated without giving effect to the January 1, 2010 change in the accounting guidance related to the transfer of financial assets and consolidation of variable interest entities (VIEs). See the company's Annual Report on Form 10-K for the year ended December 31, 2016 for more information.
- 12 Represents the company's aggregate indebtedness for purposes of the Purchase Agreement debt cap and primarily includes the par value of other short-term and long-term debt used to fund its business activities.
- 13 Represents the estimated average rate of guarantee fees for new acquisitions during the period assuming amortization of upfront delivery fees using the estimated life of the related loans rather than the original contractual maturity date of the related loans. Includes the effect of fee adjustments that are based on the price performance of Freddie Mac's PCs relative to comparable Fannie Mae securities. Net of legislated 10 basis point guarantee fee remitted to Treasury as part of the Temporary Payroll Tax Cut Continuation Act of 2011.
- 14 Represents loans acquired after 2008, excluding HARP and other relief refinance loans.
- 15 Certain securitization transactions for which data is not available are only included in the total single-family serious delinquency rate.
- 16 Consists of Structured Agency Credit Risk (STACR) issuances and Agency Credit Insurance Structure (ACIS) transactions. Excludes all other forms of credit enhancement, including mortgage insurance, whole loan securities, senior subordinate securitization structures, seller indemnification, and Deep Mortgage Insurance CRT transactions.
- 17 See Freddie Mac's Form 10-K for the year ended December 31, 2016 for information about the company's reported delinquency rates. The multifamily delinquency rate at June 30, 2017 was 0.01%. Source: Freddie Mac, FDIC Quarterly Banking Profile, TREPP (CMBS multifamily 60+ delinquency rate, excluding REOs). Non-Freddie Mac data is not yet available for the second guarter of 2017.
- 18 Represents the UPB of multifamily loans sold via Freddie Mac's K Certificates and SB Certificates.
- 19 Includes K Certificates without subordination, which are fully guaranteed and issued without subordinate or mezzanine securities
- 20 Based on the company's purchases of loans and issuances of mortgage-related securities. For the periods presented, a borrower may be counted more than once if the company purchased more than one loan (purchase or refinance mortgage) relating to the same borrower.
- 21 Consists of both home retention actions and foreclosure alternatives.
- 22 These categories are not mutually exclusive and a borrower in one category may also be included in another category in the same or another period. For example, a borrower helped through a home retention action in one period may subsequently lose his or her home through a foreclosure alternative in a later period.
