## Summary

From Fragmentation to Financial Integration in Europe is a comprehensive study of the European Union financial system. It provides an overview of the issues central to securing a safer financial system for the European Union and looks at the responses to the global financial crisis, both at the macro level—the pendulum of financial integration and fragmentation—and at the micro level—the institutional reforms that are taking place to address the crisis. The emerging financial sector management infrastructure, including the proposed Single Supervisory Mechanism and other elements of a banking union for the euro area, are also discussed in detail.
