Evaluating Bank Recapitalization Programs in Japan: How Did Public Capital Injections Work?

K. Nakashima, T. Souma • Published 2011 • Business

Public capital injection into the banking system is a comprehensive policy program aimed at reducing the financial risks faced by capital-injected banks and thereby stimulating their lending and profitability. Using a difference-in-difference estimator in a fixed effect panel model, this paper evaluates empirically two large-scale capital injections in Japan; the first was the public capital injection into 21 Japanese banks in March 1998 based on the Financial Function Stabilization Act, and...
